WhatNext Vision Motors: Shaping the Future of Mobility w...

TeamOverviewWorkspaceKanban

Use Case

EpicComplexity: MediumDuration: 45m

Description

WhatNext Vision Motors is revolutionizing its customer experience and operational efficiency with a cutting-edge Salesforce CRM implementation. The project streamlines the vehicle ordering process by auto-assigning orders to the nearest dealer based on customer location and preventing orders for out-of-stock vehicles. Automated workflows update order statuses dynamically and send scheduled email reminders for test drives. Key technical implementations include Apex triggers for stock validation, batch jobs for stock updates, and scheduled Apex for automated order processing. This initiative enhances customer satisfaction, improves order accuracy, and boosts overall operational efficiency.

Build for the Agentic Enterprise.
Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

Build AI agents with Agentforce, grounded in your data with Data 360

Connect Claude Code, Cursor, or Codex to your org with hosted MCP

Build in the browser with the Agentforce Vibes IDE - no setup required

Drag-and-drop when you want it, Apex when you need it

60+ MCP tools and 30+ coding skills, ready out of the box

Almost there, Nehemiah!
Check your email.

You'll receive a confirmation email soon. If you don't see the email, check your spam folder.

If we're getting a lot of signups at once, it can take a while for us to set up your Developer Edition. We'll send another email when it's ready.

Follow guided steps to finish setting it up, and use in-app guidance to learn Agentforce.

Tabs

Didn't find what you're looking for? Try using Global Search.

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

New What Is This?

Action	Label	Tab Style	Description
Edit Del	Vehicle Customers	People	
Edit Del	Vehicle Dealers	Building	
Edit Del	Vehicle Orders	Box	
Edit Del	Vehicles	Car	
Edit Del	Vehicle Service Requests	Form	
Edit Del	Vehicle Test Drives	Gears

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label Example: Account

Plural Label Example: Accounts

Starts with vowel sound ☐

The Object Name is used when referencing the object via the API.

Object Name Example: Account

Description

Context-Sensitive Help Setting

Record Types

Related Lookup Filters

Data Type

None Selected

Select one of the data types below.

Auto Number

A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula

A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary

A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Checkbox

Allows users to select a True (checked) or False (unchecked) value.

Browser window showing the Salesforce ApexCSIPage for the file `VehicleOrderBatch.apxc`. The code is as follows:

```
1 global class VehicleOrderBatch implements Database.Batchable<sObject> {
2
3     global Database.QueryLocator start(Database.BatchableContext bc) {
4         return Database.getQueryLocator([
5             SELECT Id, Status__c, Vehicle__c FROM Vehicle_Order__c WHERE Status__c = 'Pending'
6         ]);
7     }
8
9     global void execute(Database.BatchableContext bc, List<Vehicle_Order__c> orderList) {
10         Set<Id> vehicleIds = new Set<Id>();
11         for (Vehicle_Order__c order : orderList) {
12             if (order.Vehicle__c != null) {
13                 vehicleIds.add(order.Vehicle__c);
14             }
15         }
16     }
17 }
```

The interface includes tabs for **Logs**, **Tests**, **Checkpoints**, **Query Editor**, **View State**, **Progress**, and **Problems**. The **Logs** tab is active, displaying a table with columns: **User**, **Application**, **Operation**, **Time**, **Status**, **Read**, and **Size**. The table is currently empty.

At the bottom, there is a **Filter** button and a link: [Click here to filter the log list](#).
